Needs Explanation

Sen. Malone (R-Nev.), touring the Soviet Union, says that the Russians are "absolutely self-sufficient" in all such fissionable materials as uranium and dismisses as "poppycock" State Department reports Russia might be in an economic or political crisis.

We assume that Secretary of State Dulles is in some touch with his brother, Allen Dulles, head of Central Intelligence Agency.

Does Sen. Malone's political party have any explanation of this strange situation as we round the stretch going into the 1956 campaigns?
